

5.1GHz Panel 18 dBi Antenna

18 dBi Panel Antenna with 5.1GHz Frequency

This panel antenna delivers extended access point range in a single floor environment ideally positioned in the corner of a building. It functions from point-to-point so that you can wirelessly connect LANs between the buildings in a campus-type environment. It provides multiform transmission when placed on a wall, as the higher power output extends the range through typical flooring materials

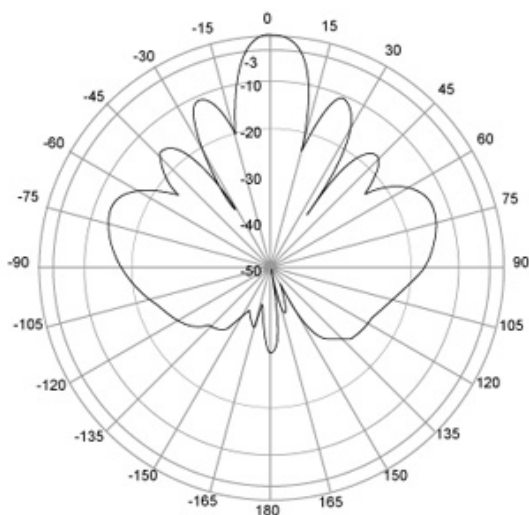

Specification:

Technical Information	
Item No.	PA-5100-18
Frequency	5100-5725 MHz
Gain	18dBi
Polarization	Vertical
Beamwidth degree	Horz.15° Vert.15°
VSWR	≤ 1.5:1
Impedance	50 Ω
Dimensions	
Size	L239 x W239 x H30 mm
Weight	2100 g
Connector	N - Type / Female

Plane field Patterns

Horizontal

Vertical
