

2.4~2.5 GHz MIMO Panel II 10 dBi Antenna

10 dBi Panel II Antenna with 2.4GHz ~2.5 GHz Frequency

This panel antenna delivers extended access point range in a single floor environment ideally positioned in the corner of a building. It functions from point-to-point so that you can wirelessly connect LANs between the buildings in a campus-type environment. It provides multiform transmission when placed on a ceiling, as the higher powder output extends the range through typical flooring materials

Specification:

Technical Information	
Item No.	PAII-2450-10SMA-MIMO
Frequency	2.4-2.5 GHz
Gain	10 dBi
Polarization	Vertical or Horizontal
Beamwidth degree	Horz.75° Vert.38°
VSWR	≤ 1.5:1
Impedance	50 Ω
Dimensions	
Size	L450 mm x D130 mm
Weight	540 g
Connector	SMA - Type / Female X 2
