

2.4~2.5 GHz MIMO Panel II 11 dBi Antenna

11 dBi Panel II Antenna with 2.4GHz ~2.5 GHz Frequency

This panel antenna delivers extended access point range in a single floor environment ideally positioned in the corner of a building. It functions from point-to-point so that you can wirelessly connect LANs between the buildings in a campus-type environment. It provides multiform transmission when placed on a ceiling, as the higher powder output extends the range through typical flooring materials
